Creameries Show us increase in Butter Production.

Dairy Commissioner, at first anconvention of Saskatchewan rymes's association, reviewed promof 1915 which shows a great in the butter production of the operative creameries amounting to ent in quality is shown by the ace accorded Saskatchewan ter in outside markets. Shipments t the province for the year totaled 52 carloads.

According to bulletin just issued by the Manitoba department of agriculture, the dairy industry had a very sful year in 1915. There was an increase of over 1,000,000 lbs, of creamery butter produced, as against the previous year, about 200,000 lbs. increase in dairy butter and over 25,300 be, increase in the cheese output. The increase of the total value of milk and milk products was over \$427,000. The luction of dairy butter for Manibe during the year was 4,150,444 lbs. and it brought an average price of 23c per lb.; of creamery butter 5,839,667 the were produced which commanded 29c per lb. on the average; cheese protion was 726,725 lbs. which sold at an average price of 15c-the total value of these three products is given as \$2,760,608; in addition to which the milk produced is valued at \$525,650 and the cream at \$158,827, the average price of the milk being reckoned at 2.1e per lb. and of sweet cream at 32c per lb. butter-fat. In connection with the dairy industry it is interesting to note that almost the most important fodder crop now is corn, of which the 1915 production amounted to 190,132 The biggest cultivated fodder crop is timothy which for last season produced 193,357 tons and the next most popular crop was brome grass with 45,815 tons; of alfalfa and clover there were produced some 38,000 tons. The number of cattle in the province is given as 631,005, which is an increase of 130,000 over the previous

The fact that the Red Deer, Alberta, cheese factory is handling four times as much milk this season as last winter shows the growing improvement in the dairy industry. On Feb. 14, it was ced the factory had just shipped two tons of cheese for Calgary

Cardston, Alberta, creamery in 1915 paid its patrons a rate of 27%c per lb. for butter fat and had a profit remaining over all expenses of \$5,584. The creamery during season distributed among farmers \$61,117 and manufactured 256,000 lbs. butter and 13,000 lbs. cheese. Average price realized for butter was 284 cents.

The development of the dairy industry of Northern Alberta is well indicated by the growth of a prominent dairy business here, which in 1915 produced 2,525,000 lbs. butter, an increase of 400,000 lbs, over the previous year. This product has found a market in all parts, of Canada and this year will enter the export trade. Advertisement.

FIVE MEN HALT PAY CAR AND TAKE SUM ESTIMATED AT 835,000.

ONE MAN SLIGHTLY INJURED

Detroit Firm Took Unusual Precau tions to Prevent Such Crimes, But Young Men Carry Out Robbery Plans.

Detroit, Mich.-Five automobile bandits, who held up the paymaster and armed guards of the Burroughs Adding Machine Co. and made away with between \$33,000 and \$34,000, after shooting and slightly injuring one man, apparently have escaped. Eleven machines filled with offi-

cers scoured the country in every direction after a fruitless northwesterly chase of 36 miles. Every road out of the city was searched, including those leading to Lansing, Jackson and Ann Arbor and the Detroit-Monroe and Toledo highway.

The amount obtained by the band its, at first placed as high as \$45,000, was declared by P. G. Chapman, secretary and treasurer of the Burroughs company to have been between \$33. with \$75,000 was not molested.

The car held up carried a sum said to have been \$50,000. A car following U. S. ACQUIRES THREE WEST MEMBER OF PARTY DESCRIBES \$75,000 was not molested The condition of Rudolph Cooper,

a Burroughs guard, the one man injured as the result of the holdup, war said to be satisfactory.

Riding in a large motor car with part of the money for the week's pay roll in bags on the floor. Thomas Sheehan, paymaster of the company, was within a half block of the plant when a smaller car drove alongside the surrender of the money.

The five bandits apparently ranged in age from 18 to 60, according to some witnesses. They were un-masked. One man carried a rifle, while the others were armed with automatic pistols.

Unusual precautions have been taken by the Burroughs company to prevent such occurences. Every half block from the bank the guards are picked up as they go along.

Witnesses declare the bandits' success was aided by the apparent slowness of the guards to realize what was being done.
